Seasons are a natural phenomenon. There are four distinct seasons: spring, summer, autumn, and winter. Each season has unique characteristics and brings about changes in weather, nature, and human activities.

During spring, the weather becomes warmer, and nature comes alive with blooming flowers and budding leaves. It is a time of renewal and growth. People often engage in outdoor activities like picnics and gardening during this season.

Summer is known for its hot and sunny weather. It is a time when schools are on break, and families go on vacations. Many people head to the beach, swim in pools, or enjoy outdoor barbecues. Summer is also a season for various festivals and outdoor concerts.

Autumn, also known as fall, is characterized by cooler temperatures and leaves changing colors. The air becomes crisp, and people start wearing warmer clothes. It is a time when farmers harvest their crops, and many celebrations take place, such as Halloween and Thanksgiving.

Winter brings cold weather and often snowfall in many regions. It is a season associated with holidays like Christmas and New Year. People wear coats, scarves, and hats to stay warm. Winter activities include skiing, ice skating, and building snowmen.

Answer the following questions about seasons:

What are some characteristics of spring?

What activities are common during summer?

What changes occur during autumn?

What are some winter activities?

Weather is a fascinating aspect of nature that influences our daily lives. It refers to the atmospheric conditions in a particular area, including temperature, humidity, precipitation, wind speed, and atmospheric pressure. The weather can change rapidly, bringing about various phenomena that captivate our attention.

One of the most common weather conditions is rain. Rain occurs when water droplets fall from clouds and reach the ground. It can range from a light drizzle to a heavy downpour. Rain is vital for the growth of plants and crops and helps replenish our water sources.

Snow is another enchanting weather event, especially in regions with cold winters. When the temperature drops below freezing, water vapor in the air crystallizes into snowflakes, forming a soft blanket of white on the ground. Snow can be a delight for children, who enjoy building snowmen and engaging in snowball fights.

On the other hand, extreme weather events can be more challenging to deal with. Hurricanes, tornadoes, and cyclones are powerful and destructive storms that can cause extensive damage to homes and communities. Being prepared for such events is crucial to ensure safety and minimize their impact.

Answer

What does the term "weather" refer to?

- a) The conditions in outer space
- b) The atmospheric conditions in a specific area
- c) The movement of celestial bodies

How does rain occur?

- a) Water droplets fall from clouds to the ground.
- b) Water droplets rise from the ground to form clouds.
- c) Water droplets evaporate into the atmosphere.

What is the significance of rain?

- a) It helps water the plants and crops.
- b) It causes damage to homes and communities.
- c) It creates snow during winter.

How is snow formed?

- a) Water droplets crystallize into snowflakes in warm temperatures.
- b) Water droplets fall from clouds and freeze on the ground.
- c) Water vapor in the air crystallizes into snowflakes in freezing temperatures.

What can extreme weather events like hurricanes and tornadoes cause?

- a) Extensive damage to homes and communities

- b) Growth of plants and crops
- c) Delight for children with snow activities

Why is being prepared for extreme weather events important?

- a) To create an enchanting atmosphere
- b) To ensure safety and minimize their impact
- c) To enjoy outdoor snow activities

Select the appropriate form of the verb in the past perfect continuous tense to complete the sentence.

She _____ (study) for three hours before she took a break.

I _____ (study) for hours when my phone rang with the news of the exam cancellation.

By the time they arrived at the theater, the movie _____ (already, play) for 30 minutes.

The chef _____ (prepare) the special dish all day before it was finally served to the customers.

When I visited my grandparents, they _____ (live) in that house for over 40 years.
